SUMMARY

Backend engineer with 3+ years of experience, including 2+ years as a founding engineer at FlintLab building distributed microservices for a real-device testing platform. Owned 6 production services end to end in Python and FastAPI, from PRD to deployment.

EXPERIENCE

FlintLab · Software Engineer & Lead Automation Engineer (Founding Engineer) Jun 2024 to Present

- Designed and shipped **6 production microservices** for Sirius, FlintLab's device infrastructure platform, owning each from PRD and design to deployment (Python, FastAPI, PostgreSQL, Redis, Dapr).
- Built a Container Management Service that provisions automation environments on real Android devices in **8 seconds** across regions, with WebSocket terminals and report export, removing all local Appium setup.
- Reduced emulator provisioning API latency by **94% (300 ms to 18 ms)** in a Genymotion SaaS integration that removed manual sign-in from test workflows.
- Architected an event-driven device enrollment pipeline (gRPC, Android DPC, ADB, Redis) that authenticates, configures and verifies Android and iOS devices on connection, replacing manual reconfiguration.
- Built Flint CLI, a cross-platform Python CLI (Windows, macOS, Linux) for remote device control with token auth, WebSocket streaming and auto-updates, distributed via pipx.
- Led a team of **5 QA engineers** and built the framework behind **612+ automated tests** (Pytest, Appium, XCUITest, Playwright) running nightly with dashboard reporting.
- Built a unified test and CI/CD pipeline for a supply-chain client on Odoo, cutting the release cycle from **1 week to 2 days**.
- Authored PRDs and technical design documents for 3 services; led the Women in FlintLab forum, presenting survey findings to leadership.

Aspire Infolabs · Software Intern (selected from a large applicant pool) Summer 2024 (1 month)

Cognizant · Process Executive Aug 2021 to Oct 2022

- Verified business listings and place appeals for Google Maps; named Employee of the Month 3 times for accuracy.

TECHNICAL SKILLS

Languages: Python, SQL, Bash, C

Backend: FastAPI, REST, gRPC, WebSockets, Redis, Pub/Sub, Dapr, event-driven microservices

Databases: PostgreSQL, MongoDB

Cloud & DevOps: Google Cloud, Kubernetes, Podman, Traefik, Kong, CI/CD

Testing: Pytest, Appium, XCUITest, Playwright, Robot Framework, Maestro, TestLink

Tools: Git, GitHub, GitLab, ADB, Linux

EDUCATION

MCA · Gayatri Vidya Parishad, Visakhapatnam

2024

ACHIEVEMENTS

- Employee of the Month, Flint Excellence Citation, awarded by FlintLab's CEO (Jul 2026)
- Featured in The Hindu at the A.P. Digital Technology Summit (Jan 2025)
- 5th place, Enterprising Bharat pitch competition by Young Indians (Yi); Best Table Topics Speaker, Waltair Toastmasters
